Lost internet connection

Video Interview Support - Nam - 2014-03-14 - 0 Comments - in Troubleshooting and technical difficulties

If you have lost your internet connection during the recording of a video assessment question please get in touch with us or the employer.

To prevent this from happening again there are a few steps you can take:

- Restart the router/ modem
- Connect directly to your router with a cable, as this tends to be more stable than Wifi.
- If this doesn't help, connect from a different location.

The video assessment doesn't require a fast connection, but it does have to be stable. If you saw a connection error message, this is because your connection dropped for a short period of time.
