Don't forget the Practice Question!

Video Interview Support - Liz - 2016-09-09 - Getting started and tips

We advise each candidate to complete the practice question as this allows you to familiarise yourself with the video assessment and technology. It also enables you to play back a video and ensure that your video and voice is being recorded correctly.

You can re-record the practice question as many times as you like, and your recordings won't be seen by your employer.
