Viewing the Video Assessment questions in advance

Video Interview Support - Nam - 2014-03-14 - 0 Comments - in General

Unless you have already been sent them, the video assessment questions will not be available for viewing in advance.

When you reach the stage of answering the questions, they will appear on the screen and you will be given a short period of time to think about your answer before recording. The time allowed to think about your answer is usually between 30 and 60 seconds, but can vary.
